(Special to The Times-Dispatch.)
NANCOCK, VA., August 26.—Now were the people of the Eastern Shore more patriotic than than they are in their effort to build a memorial hospital to the boys of the Eastern Shore, who made the supreme sacrifice. The hospital is to be located at Nancock, and will be known as the Northampton-Accomack Memorial Hospital.

A lot of two acres has been secured, and plans call for every modern comfort, including sun porches and a roof garden.

Supplies are being assembled as rapidly as possible.

The fund is composed of the members of the Northampton and Accomack medical societies, and is 100 per cent. Several dentists have enrolled.

The banquet, which was given at the Wachapreague Hotel in order that the doctors might get together to exchange ideas, proved a great success.

This week a house-to-house canvass is being made for members of the ladies auxiliary, and it is hoped that practically every home on the Shore will be represented.

The officers of the auxiliary will have charge of the drive for money, which will take place during the winter.

Several persons have promised to furnish rooms, and it is expected that every room and bed will be endowed.

This is the proposed vehicular tunnel to New Jersey is expected to solve New York's west side dock problem, new water-front system is to consist of wharves, piers, and marginal streets with warehouses and tracks, where available in the rear.

The cost of construction is ex-

pected to be within its facilities for four years time, according to Deputy Dock Commissioner Michael Cosgrove, of the War Department, who has been building along the entire stretch, and will be encountered to make a depth of 40 feet, and most of the real estate is owned by the city.

Businessmen will increase the pier storage area 50 per cent if they are made only one-story," said Mr. Cosgrove. "But because of the high value of the land, it will be uneconomical to step even at two stories. They will have the most modern appliances, or rapid handling of freight, and the use of cranes, hoists and boats of all kinds.

"The present lower North River Pier is about what it was in 1851. Its slips are so narrow now that it is not room in them to come in and out of big steamships. To afford relief the War Department has three times per year, or during the winter, to extend further offshore. The more north the piers were brought out, the worse the slips became, because boats have been continually growing bigger."

The new management paper will be published in the interest of the Northern Neck. It will be independent and non-partisan.
